I got to try the new soles Saturday on Spring Creek with CSoult. Coincidentally, my Korkers Metalheads gave up the ghost after a year and d half, so I was also trying out my new Korkers guide boots. Both the Aluma-Trax soles and the KGB boots were great. The aluminum was fantastic on slimy rocks and the KGB's gave me great support on the larger cobble in the creek. Provided I get better wear from these boots than I did from the Metalheads, I think they will be great. I'll keep everyone posted...
