The price is great. I have only ordered hooks form Allen one time. The order was for standard dry fly, scud, and tiemco 200R type hooks.

The tiemco 200R type hooks seem very good.

The dry fly hooks were made from a wire diameter much heavier than any of the Tiemco or Mustad hooks of the same hook size. Even nymph hooks like 3906B. Being that a standard dry fly hook by definition is normally made from 1x fine wire I used the Allen dry fly hooks for nymphs.

The scud hooks were also made from heavier than expected wire, but I did not have any other heavy scud hooks to compare them too.

YMMV.
