As the event organizer for this competition I can say after going for an unplanned swim that water was very cold for July! The water never got above the low 60's at the hottest time of the day. All those that fished it will agree fish were fatter and healthier than I have seen out of Spring Creek in a few years.

If you really have an issue with this competition and its valid feel free to PM me and I would be glad to talk even over the phone or over a cold beer.

I think Dave hit the nail on the head. It was great to see some guys out watching the competition.

Also Kudos to Spring Creek TU and the PFBC for there recent work on the stream the past few years in that lower end it is really starting to pay off.
