Competitor on Spring fished his whole session dry dropper, because he felt the water type warranted that type of presentation. I disagree, but that is a different conversation. I watched another competitor swing a brace of wets for a good portion of time and pick up fish and place top 3 in his session. Many guys long line nymph with size 16 flies and smaller. No anchor. It is all in the presentation and line control. For anybody that cares to believe it is just dredging the bottom with heavily weighted jig flies, you are really really wrong.
