My experience on the TT section has been mixed. I have had some luck with terrestrials in mid-summer, scuds are often good there.

this is cold water all year! just below lake Marburg.

I think you can park at Browns road, just across the bridge...upstream from there is deep and lots of silt, tough to wade. so head downstream. there are other parking spots nearby, downstream along RR tracks, good spots near there with some recent improvements made.

While I agree with Jake, good fishing along Codorus in York, not trout water, and not treating me well this year.
