Definitely should tip. I thought about going out with a guide to a Central PA stream this year and it was about \$250.00 for a full day. If I get 8 hours of fishing out of that, that's only \$31.00 roughly to get that service and years of experience/knowledge from them.

In any industry that you are in (my case; Finance), we pay up to \$500 an hour for Consultants (might as well call them guides), so throwing a \$50 on top for a tip isn't adding much to your hourly rate.
