I'm good with fishing till turkey season. I tried bowhunting one year, but it didn't "take." With all the posted land I once hunted, turkey hunting is getting tougher, too, but I still like to be bested regularly by these fine gamebirds. When I manage to tag one, I feel pretty good, almost as good as I do when I land a big trout I've been after. It's a good time to be off the water, too, as turkey season pretty much coincides with trout spawning around here.
