Sounds great! I've enjoyed the nights of pulling in the sunnies.. and when they happen to become the real bait it can be a hoot! Never gone float tubing before, but I can see the appeal.

Wish I knew a farmer or pond-owner in the HBG region to hit during these warm water days! My nephews and I do pretty well at the clark's creek hatchery, but I think a bunch of gills and rockbass would make them just as or more entertained!

Anyhow, glad you found some LMB in there as well. Geeze, it's been 2 years since I've gotten into one. Trout are too alluring!
