I think the Redington Pursuit comes in a 10 foot 7 weight at a similar price. Just another option to check out.

I've been using a Gander Mtn. Guide series 10 foot 7 weight for steelhead for about 5 years now. It's the right tool for the erie tribs. It's also passable for salmon, but a little on the light side.

You've gone 5 years without breaking a rod???
