I have been hitting it hard on the TT stretch because its close to home. I agree...crowded, lots of very small fish. Understand that this water may hold a few bigger fish but you will mostly be fishing for 5-8" browns. Find a pull off and explore. I found that most if the water was consistent in fish numbers. I will say that most any generic nymph pattern in 14-16 has worked well for me including tiny pink San juAns.
