Do ducks put down fish?

It's happened many times... I approach the water I want to fish and hear a frantic scurry in the tall grass. A family of ducks go cruising through the water...flapping and quacking. I cant imagine this is a good thing, but I fish it anyway. My results on hooking fish have way more factors than just duck activity, so let me know what you've found. The only conclusion I can come up with is that Stocked trout don't care too much. Wild trout will take a hint from the ducks and hide for a while.
