I fish it sometimes, as it's a block away, but it's always been fickle. A local club stocks it up here in the Grove, but only a few if any make it by fall and they're all at the mouths of smaller creeks, like you said. Up this way you catch 20 chubs before you catch a smallie and a few hundred between trout, but the chubs are fat and fight well, so it's worth it. 😁
