Any PAFFer's in the Lewistown/State College/Huntington area? I'll be relocating there for my job this coming week, and will be looking for places to fish!

I'm really excited about all of the great trout streams that will be within a relatively short drive from me. Not really sure which one I should start with. I fished Spring Creek near the fisherman's paradise area once when I was in college up there (on spinning gear), but haven't been back since, so I'm definitely going to try that area again at some point.

I've also heard good things about Fishing Creek, but never managed to get there.

Where should I start? What streams are closest to Lewistown?

Technically I should be using my next couple weeks off to study for a certification exam before I start my job, but I think I'll probably be able to find some time for fishing 😊 I have to keep my priorities straight, after all.
