Sal,

Who is poaching it? I drive by there 2X daily and fish there often and I rarely see anyone there fishing. Its been even less since regular stocking stopped. I did see one of the local landowners and his kids once with spin rods and tackle boxes in hand heading towards that FFO area only. But I have fished long stretches of this stream and rarely see anyone.

More likely for the other reasons you have stated altho am interested in what habitat improvements you would like to see. I keep hearing about cows in the creek and have never seen that either. I have fished all the way from 772 to the Chiques and they are all fenced out.
