I'm not sure what just happened but I saw a video where you could add a 6" extension to the rod so that you can reach the fish when nymphing. What would happen if I removed the 6" section and took a half step forward?

This make less than no sense to me but then again, I'm not a competition fisherman.

Gimmick. If you buy now, I'll send an additional extension...you simply pay shipping and handling.
