My first experience with big steamers in stained water was in March on Penns. Water was up and off color but not blown out. I threw big black and purple streamers with zonker strips and deer hair/marabou. I had lots of hits, some were shark week worthy. I only managed to land one fish (about 17") but several of the missed fish were easily 19". I wish I had articulated multi hook streamers because most of the hits came up short. I'm sold on big meat in high water. Though it'll wear you out.
