Nice, I was hoping you would chime in. I know you have been a salt guy for a long time. In your opinion, would a kayak 100-200 yards off shore be any superior than casting 50-75 yards in the surf? I know the big, big blues are still going to be north of OBX come the middle of august, but I didnt know if I could get into 20" blues if I got out passed the surf a bit.
