Six-Gun, if you're planning on fishing small streams, you will probably need 4X to 6X tippet, and you're 8'6 three weight will do. Small stream trout are not very picky, and you will not need a ton of flies. The following are some good general small stream flies.

Dries: Royal Wulff(#12-16) Elk Hair Caddis (#12-16) Stimulator (#10-16)

Nymphs: Pheasant tail nymph (#12-16) Hares ear (#12-16) Caddis Larva (#14-18)

Streamers: Woolly Bugger (#10-14) Mickey Finn (#10-14)

Those are some popular PA small stream flies, and that's all you really need if you're fishing the small, unpressured streams. If you're fishing more pressured streams that have a richer food source, than that is a completely different story.
