I was out last Friday at Neshiminy off of York road using several topwater poppers - decided to try one of my streamers Red and Yellow deer hair with a brass band in red on the hook shaft and one greenish dark brown plastic bead. Well wouldn't you know it the red deer hair came off as I was tying it on my line. I still went with it and ended up with 4 SMB's which the biggest one was close to 14" long. I just love watching them jump out of the water trying to shake the hook.
