used to take surf boards out that far and fish, sometimes it got a little scary seeing a shark cruise by. never dumped coming in to beach. maybe boards ride better in surf. I think the back areas will produce better than out front (surf). to early for runs to start. most fish off of beaches will be way out 1 mile +. If you caught snappers (small blues) in the surf it usually means they are moving out from the back bay, good place to hit fish is where they come out through inlets.
