I wasnt going to get dumped while fishing. I was planning on getting out passed the waves. Its coming in where I might get wrecked. I have had it happen before. Bringing a kayak in isnt easy.

Had the same thing happen to me in the OBX when I took my SOT down. It's like surfing, but in a kayak. If you can get out past the waves, you'll be in good shape. Personally speaking, I'm not a big fan of heading out past the waves in a kayak. Rogue waves come along and make for an interesting time of it...

Getting dumped by a wave while coming into shore in a yak is no fun.
