I waded the Susquehanna Saturday with my nephews. Near Marysville area. Tossing spinners for bass. Caught 18-20 myself and the kids combined for another 6-8. We caught a mix of sizes from 8"-16". It's was then my last trip there (5 yrs ago). It looks promising when you catch some of the little guys. I remember 150 fish days up there with a dozen of the bass in the 18"-21" range. 5 years ago, I hardly caught any in that section. Maybe it's on its way back.
