glenrock,

I enjoyed meeting you briefly at T-town on Friday before you guys set off. Sounds like you guys had a great time. Fishidiot and I had a nice evening wading on the T-town pool. It was my first time flyfishing the Juniata so I learned a lot from FI (he is a wealth of information). We didn't hit the topwater bite like you guys did but I did manage to catch a couple smallies on a chartreuse Stealth Bomber in the final hour of the day. I probably caught about 20 fish (SMB, Rock Bass, Redbreasts and Fallfish). All in all, I had a great evening and we also saw a few sporadic dobsonflies hitting the surface. We didn't see a major hatch of them but none the less they are really cool to see. Glad to hear you had a good time. The Juniata River is a gem!
