I try to get out fishing as well as for waterfowl in the fall. I have hunted waterfowl for so many years I can't not go and fishing is the same way for me. So the hard part is working each into the time that I have. And Sundays need to be spent sometimes getting some adjustments done for the ducks and geese. But I have had waterfowl seasons where the birds were just not moving as they usually did that time of year so I hit the streams. The feathers are hard to beat too.
