Agreed. More testing and monitoring our streams and rivers is what we need, not less.

The ironic thing, to me anyway, is on page 39 of the FBC rules and regs guide, Valley Creek is listed as C&R / no harvest with a one meal / month fish consumption advisory. Guess they don't want any of the poachers to get sick?!?

Anyway, the silver lining is the stream is recovering for the PCB pollution that happened in the 80's.
