I'm taking my nephew up and it's 99.9% chance we are floating. We will be in Hancock around 8am Saturday. Got to check in and set up a shuttle at the Capra. Meet there or at breakfast will work. Have sulphurs 16-20, iso in 10-12, olives in 18-24. Be prepared to toss it 50' with a 17-20' leader. Don't go below 5x unless the line won't go through the hook eye. When are you driving up?

Do you use so nymphs or dries?
