On a similar note to the whole morals of C&R thing, I think tranquilizer deer hunting would be awesome.

Can still have our normal doe season for the meat and population control.

But for most of the year, you could let hunters "release" their deer unharmed. Stick a dart in it, go up and take your hold and grin pics, walk away. No dragging and mess. You don't have to quit hunting just cause you got one. Season can be extended to cover most of the year, which IMO is one of the reasons I like fishing more than hunting.
