Best thing that could happen to this stream is them lifting the C&R regs and instituting some type of slot limit , allowing harvest of 8" to 12" fish.

Most the the "decent" fish I catch on Valley are around 8-12". It's rare to catch one larger than that, since the stream doesn't have the best habitat and food supply in the world, IMO. Cropping out most of the decent fish would not enhance and would actually diminish the angling experince on the stream, IMHO.
