In your post #55, you said, "as I stated before, it doesn't matter when you kill a doe in the Fall, she's not going to have fawns the following Spring," That's where you mentioned that hog wash. Like I said, I don't know where you get your info.

What about that is not true? If a doe is killed in the fall she IS NOT going to have fawns in the spring. 😊 She is DEAD! 😊
