Dear Dave, I'm not doubting the quality of the information you will receive here but you may want to sign up at paddling.net and ask your question there. You will be asked how big a fellow you are and where you plan to fish? Those are important considerations. If you are bigger than 200 pounds you will probably be told to look at 16 ft tandems. I'm over 300 pounds and I need a 17 footer to be comfortable. Good luck, Tim Murphy 😊
