Hi dc410,

Thanks for taking a look at the site. We are working in smaller sizes. I'm in Asia now having several meetings regarding our hooks along with other things. We've made the move out of China to Korea and Japan (soon). We've been discussing smaller sizes and adding several other hooks to the line up. The smaller you go the harder they are to make and maintain quality.

We will add a new scud hook to the site next week as well.

Thank you

Justin
