jkilroy: When were you there? There a plenty of fish at Allenberry, but they are not easy. In my experience, three is not bad, but again it depends on the time of day. It also depends on if you were fishing the chute, the deep water (midges) above the dam, or below the dam. Others may have different opinions, but those are mine. I like the deep water and below the dam. Not a fan of the chute.

Jim
