Salmon River Area Stream Info

I've fished the SR several times in the past couple of years in the DSR and done well, spectacularly well last Fall. We generally make a "death drive" and thus have no time to explore. This year, the guy I fish with has retired, as am I, so we have more time to explore the area. I'm interested in finding information about other streams in that area, especially access. I do understand that flow in streams other than the SR is controlled more by the amount of rain as opposed to what's let out of the dam on the SR. We're considering a guide for a day but that's a pricey undertaking though perhaps worth it for a one-time deal to gather information quickly. Anyway, any info would be helpful, perhaps best done via PM.
