I fished the little J sunday 8-4 at the New Enterprise blasting site, from the bridge towards birmingham about a mile from 10-1. Water was 66-67 degrees, saw a few caddis and a couple bwos in the air. Fished a hopper with the green weenie dropper, landed 14 missed about half as many more, all on the weenie. One fish over 12, and had a long distance release on one i gestimated to be 15. Water is low, didnt catch anything for first half hour when i lengthened my leader out to 14', from then on it was golden.
