I love fishing terrestrials this time of year. Hoppers on the J have been a bust for me though. Ants have been productive along the banks. Lost a beauty right at my feet on the biggest, ugliest spider pattern I've ever seen. Not even sure where it came from, but it was in my box. I saw a him rising over and over under a bush and he wouldn't take anything I threw at him. Splashed that big spider on his head and he hit it immediately.
