I think your best bet would be to use a backpackers pack....or ski pack....I spent a couple days in the Smoky Mountains and used a North Face Patrol 35 to carry my stuff while I hiked up stream. It has enough room to stuff waders boxes tippet and you can attach the boots to the ski carry harness and a rod tube in the water bottle holder or strapped to the back.

I honestly wouldn't be afraid to look outside the realm of fishing packs.....take your boots and waders to dicks/gandermountain/cabelas etc and try stuffing them into the packs.....you can look at a mountaineering/ski pack for all the accessory straps that they employ
