So, I have been floating the Lehigh pretty often the last few weeks and have been experimenting with patterns. The guys over at Fly Fish Food really inspired me with their Cheech Leech. I went out and bought every color marabou I could find. I have really got into tying some streamers. I have an order into Arizona dubbing for some of the longer fibred dubbing, but until it shows up I have to go with ice and UV dub. Hope you guys like.
