For public access, here are the maps. Look for Oswego Co in Region 6 and Jefferson Co. in Region 7.

It's been discussed before here, but the tribs can be very good and exploring can produce some surprises. Runs can be different in each, so some networking/exploring are in order. The Sandy's are probably the most popular Salmon R alternatives and some of the walk in areas have good numbers of fish with low numbers of people. Try the very upper sections of streams like Trout Bk where the tumble off the plateau. It looks like a high gradient brookie stream, but you can tangle with fish measured in lbs rather than inches.
