Nice flies, sandfly. Black and orange Clousers with copper flash I'm sure you know this as well as black and red, i see you already have white Clousers which is good, Deceivers as well in those colors. Ive said this before but the Orvis rattle shrimp has done the best for me the last couple years and I've been fishing down there for a while. So maybe ty some Clousers with rattle eyes too? just a thought
