So I'll be going to Grand Cayman this January and plan to do some bonefishing and tarpon fishing. I'd like to get a neck gaiter to help with the sun while I'm there. Does anyone have any opinions or tried any of these out? So far I'm thinking the Simms one due to it being longer to cover all of the neck and having mouth holes. However some of the reviews say the mouth holes aren't the best. If anyone has a different brand they like feel free to share.
