First off I don't want this to come off as an advertisement or anything of the sort. I have no affiliation with the companies, I just like their products from years of use.

I thought I would post about the new small stream setup I'm working on. I'm kind of excited about it. Actually it will probably replace my 5wt for all my dry fly fishing (which is 99.8% of my fishing).

I recently came across an nos Sage TXL 363-3. I decided I would couple that with the Galvan Brookie 2-3. All I'm waiting on now is the line. Which is on order since my fly shop don't carry Rio and I wanted to give their line a shot since I've historically used SA.

I didn't see anything on the Brookie reel and thought I may be able to add some insight once I get to fish it.
