Personally, I'd take the word of the PA DEP on this with a large grain of salt.

But you would take the word of the press over them or is it just for certain subjects?

Where did I say that? My opinion is based on my interactions with a DEP official on issues similar to this and because of that experience I have very little confidence in our DEP. In my personal experience with this official I've found their involvement in their job of monitoring a specific quarrying operation to be lackadaisical at best (and the company knew this and clearly used it to its advantage and this idiot didn't even realize it.) Add to that this official was a better mouthpiece for the private company than their own people were.
