Had a great experience this weekend exploring for the first time a back country stream we had identified through topo map reviews and a review of the information available at PFBC for wild trout. This stream was remote as all get out and hard to get to. Truck, then mountain bike, then hike in.

They are out there, ladies and gentlemen.

Sadly, I cannot get the picture to post. Imagine a 8" brightly colored brookie laying next to a fine PA builder crafted bamboo rod, with a Peerless reel, and you've got it.
