Ed, you are so full of useful information. LOL. I like the Orvis "Big Eye" size 24's for my Trico's. They are ALOT easier to thread the tippet thru the eye and they seem to work OK.

The more you hang out with Ed, the more you realize he's got quite a bit of non-useful information as well.

I find that hard to believe. 😬 I have to stick up for Ed on this one. He has NEVER gave me any non-useful info. 😊
