VERY nice, Mike. Thanks for keeping us up to date.

Back not that long ago, I imagined the future of fishing in PA and believed we would xxxxxx up coldwater trout fishing and have mostly coolwater smallmouths left to fish for in many of our streams and rivers. Not!...quite the opposite.

Keep surveying and keep racking up the Exceptional Value streams so they are afforded more protection / conservation.

We should all be on guard for the greedy Politicians that seek to take away the ability of the professionals and scientists to make judgements to protect our fish and wildlife based on scientific data.

[Here](#) is a thread dealing with that very subject.

Thanks again, Mike. Keep up the good work.
