URL:

Yesterday afternoon I fished Treater Run in the Bald Eagle SF. On my drive out of the SF on Treaster Valley Rd I noticed what appeared to be recently installed in-stream devices on Havice Creek immediately upstream of the Trester Valley Rd crossing, just before the intersection of TV Rd and Sigerville Pike.

Lat. 40.743301

Long. -77.529448

Does anyone have any info on this project? It appeared to be located on an Amish farm, but I was wondering who designed and implemented it, and what it's goals were. I didn't have time to stop and examine it closely, but intend to do so someday. Thanks.
