how much are you going to be fishing for the species listed and where. if you are going to be fishing anywhere in the surf in the north east I would say get a 10. but it looks like you are mainly fishing fresh water species more often.

for salt the salt I have an 8 and a 10 wt rod. for shad I used a 8wt but I also used my 5wt. you can get away with it.

id also say go on the heavy side. I've caught schoolies on my 10 and they still are fun to catch.

good luck with what ever you choose
