After many backpacking trips I've decided that the larger vest/packs are too cumbersome to fish with comfortably. I settled on packing everything in a medium sized external frame backpack and packing a slim vest with everything else and ditching the pack while fishing.

This is what I do on my overnight hiking/camping/fishing trips too. Frame pack to get into camp and get set up, then a normal sized backpack or sling pack for fishing. I equate it to the guy with a motorcoach who tows a Civic behind it.
