I prefer a 3wt for small stream fishing. I also prefer a medium-fast action. I've fished 7' 6" 4wts and to me they are just a little heavy, but my idea of small streams, and what inhabits my small streams, may vary.

Like was said above, go cast as many rods as you can and pick the rod you like best. I did that years ago and it turned me into the "Sage snob" I've been told I am now.
