I got a 5 foot 3 wt fiberglass rod that cabelas makes. thing is awesome. takes a fish or two to get used to it. the whole rod bends and the fight is much different then a graphite rod. bought if for fishing valley creek. there are a lot of small browns. a 6 inch brown if like catching a 14 inch fish on it. that being said I have pulled up some 15+ in fish on if. they give you a run for your money. I can cast if about 20 to 30 yards. and it is tough as nails.
